

WATER QUALITY INLET

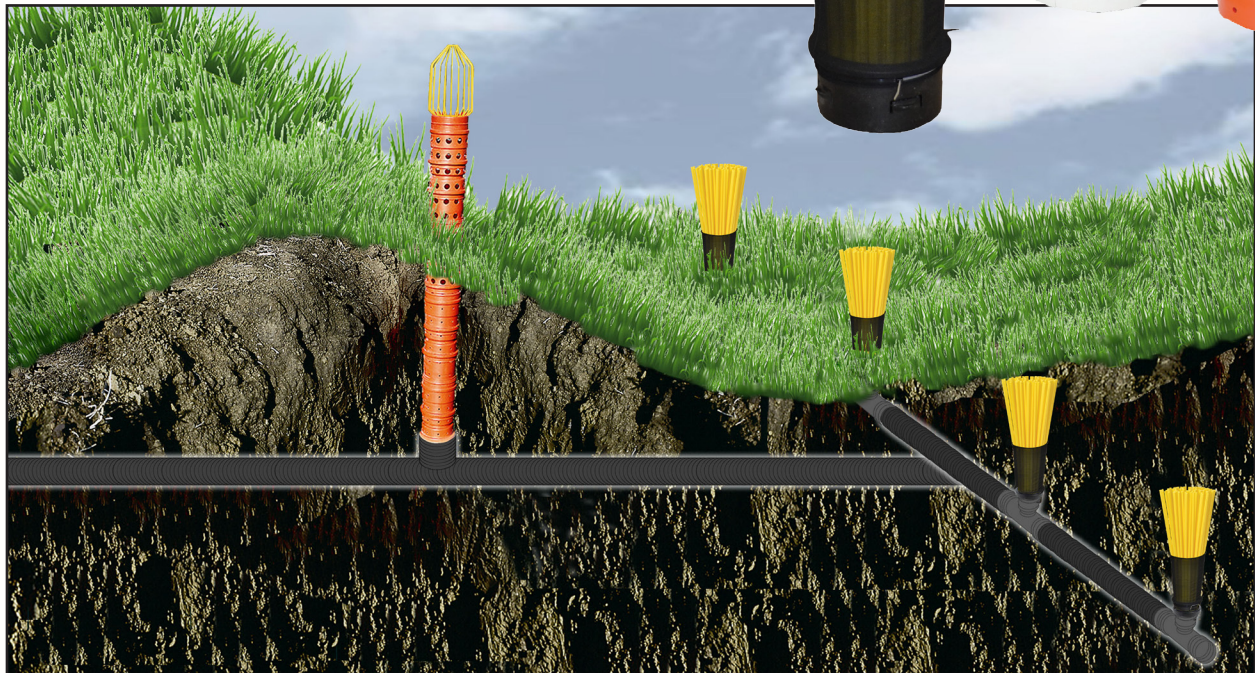

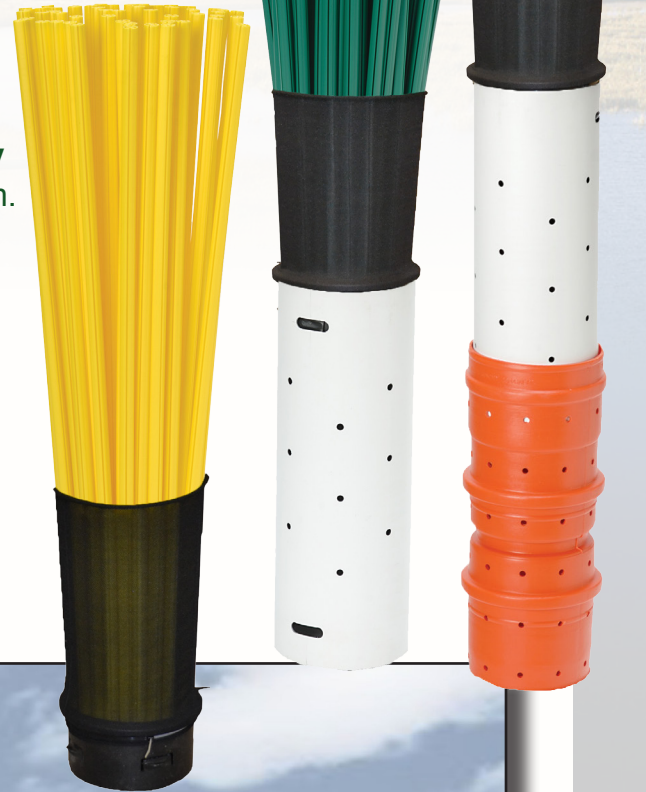

**Farmer-friendly surface inlet:
flexible material reduces damage on impact!**

Agri Drain's low-velocity Water Quality Inlets replace standard inlets in farm fields, ditches, dry dams, and terraces.

They **resist plugging** and **improve water quality** by filtering debris before it enters the drainage system.

- Available in 4", 6", or 8" diameter in 18" or 36" heights.
- Available in green or yellow.
- 12"-tall mesh sock provides additional filtration at the base of the wick as soil settles after installation.
- 6"-diameter adapter provides a stable connection to Hickenbottom, Precision, or Quick Drain underground sections, and corrugated plastic tubing. Base will also snap into single-wall corrugated plastic tubing.
- All intakes require periodic maintenance.
