

Automatic Trailer Remote

Don't worry about misplacing or losing your trailer remote by always having a spare on-hand.

- ◆ For use with automatic Maxi Stringer Trailers with DYNA Jack Pumps.
- ◆ This remote will not work with pumps that originally came with a fliptop remote.
- ◆ Wireless remote control works up to 100'.

How to pair a new remote with your pump:

- 1. Enter "Learn Mode": Push & hold the on/off button on the receiver module on the pump until the LED starts to flash, then release the button.**
- 2. Push & hold the on/off button on the remote until the LED on the receiver module on the pump stops flashing and comes on constant. Release the on/off button on the remote. The remote is now "learned" (paired).**
- 3. Option: Pair another remote by repeating step 2. Note: The receiver module remains in "learn mode" as long as the LED is flashing.**
- 4. To exit "learn mode", push & release the on/off button on the receiver module. The light will change to constant on. The unit will also exit the "learn mode" upon 30 seconds of no activity.**
